

## **ISAR's Model Statute Regulating Dog Breeding, Facilitation and Sales**

At this very moment, literally countless numbers of dogs, certainly hundreds of thousands, are held captive around the world in wretched conditions, while being used and abused as living breeding machines by conscienceless breeders, facilitators and commercial retail sales outlets whose only concern is for their own profit.

Because much of that abuse occurs in the United States, and because ISAR's self-imposed mandate is the protection of animals, we have prepared a comprehensive [Monograph](#) containing ISAR's Model Statute Regulating Dog Breeding, Facilitation and Sales. In effect, our Monograph is a brief in support of our Model Statute. ISAR's approach to the dog breeding problem is revolutionary because our goal is to end virtually all breeding of dogs in the United States and to prohibit the importation of canines bred elsewhere. *End* the breeding, not perpetuate it.

ISAR's Model Statute's imposition of tough regulations on breeders, facilitators and commercial retail sales outlets is unapologetically draconian. This is our intention and our goal, because only in this manner can the dog-trade's participants' appalling, and often illegal, conduct be regulated out of existence once and for all.
